

**UNPARALLELED
CONNECTIVITY FOR
BUSINESS CRITICAL
OPERATIONS**

Carrier

[illegible]

TAMPNET CARRIER

Tampnet Carrier evolved out of Tampnet's original offshore network, operating and growing for over 20 years across the North Sea.

Carrying more than 30% of the data in and out of Norway, these exclusive routes provide unique, fast and reliable access to key sustainable data centres.

Unrivalled benefits

- Reliable and secure connectivity
- High capacity, low-latency solutions
- Scalable and responsive to meet demand
- Redundant route options

Unparalleled Connectivity for Business-Critical Operations

- 8 countries
- 40+ vital data centres
- 12 key European and American hubs
- Norfest™ integrations

TRUSTED, FAST, RELIABLE

Tampnet Carrer is trusted by the largest global energy operators, hyperscalers, financial markets, gaming platforms, telecommunication carriers and clients with mission-critical operations where only the fastest and most reliable connectivity solutions are accepted.

We connect European cities over three discrete routes from Norway to Great Britain, as well as routes via Sweden and Denmark.

Our high-capacity network between the Nordics and Euopre is what makes us unique and underpins the rapidly growing datacentre industry in the Nordics.

NORFEST

by Tampnet Carrier

Norfest™, our new 749 km subsea fibre cable is built to the highest quality standards to provide the lowest latency and greatest capacity link to the most sought after cities and energy efficient data centres in the Nordics via 10 direct landings.

Designed to meet the ever-growing data demands of a digital world, Norfest™ provides reliability, scalability and accessibility required for the future.
